COIN QUEST

One-Page Game Design Document • 2D Coin-Collection Adventure

Prepared by: Vishali S **Platform:** Browser (HTML/CSS/JavaScript + Canvas) **Genre:** Casual arcade

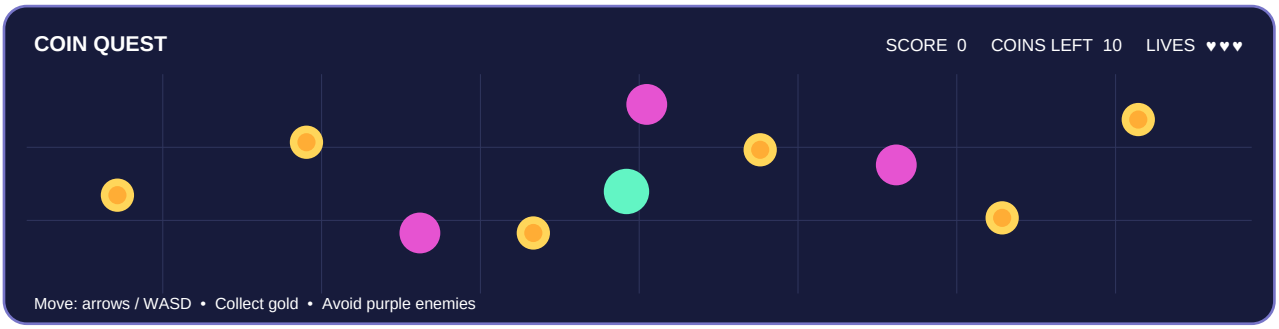
GAME IDEA & AUDIENCE

Coin Quest is a small 2D arcade game for casual players and beginners. The player moves around a bounded arena, collects gold coins, and avoids moving purple enemies. The goal is easy to understand and designed for short play sessions.

GOAL, RULES & CONTROLS

Goal	Collect all 10 coins to win.	**Controls**	Arrow keys / WASD or on-screen ▲ ▼ ■ ■ buttons.
Scoring	Each coin adds 1 point; remaining coins decrease by 1.	**Lives**	Start with 3 lives; enemy collision removes 1 life.
Win	Score reaches 10: show “YOU WIN”.	**Lose**	Lives reach 0: show “GAME OVER”.

MAIN SCREEN SKETCH & FEEDBACK STATES



FEEDBACK STATES

Coin collected Score +1; coins left –1	**Enemy hit** Lives –1; brief invulnerability	**Win** “YOU WIN!” after 10 coins	**Game over** “GAME OVER” at 0 lives

Prototype note: Placeholder shapes are used for the player, coins, and enemies. The prototype demonstrates movement, coin collection, collision, scoring, lives, win, and game-over states. Future upgrades may add sound, levels, and saved high scores.
